Competitive and Smart Europe

PRECognition – Intelligent Maintenance Platform for Production Equipment

Duration:
10/2021 – 02/2025

Total budget:
€397,425.00

The business is funded under the “Innovative Investment Plans” action (KMP6-0077768). The project involves the design, research and development of an integrated system for the analysis and management of production equipment condition data, combining innovative failure prediction and detection models with knowledge-based event management techniques and maintenance performance improvement.
